T cell activation involved in immune response -		2.1		
regulation of T cell activation -		2.0	1.5	
regulation of production of molecular mediator of immune response		1.6	2.3	
regulation of innate immune response -		2.4		
regulation of immune effector process -		4.4	1.5	
regulation of alpha-beta T cell activation -		1.7		
regulation of adaptive immune response based on somatic recombination of immune receptors built from immunoglobulin superfamily domains -		2.2		
regulation of adaptive immune response -		2.5		
production of molecular mediator of immune response -		2.5	2.3	
positive regulation of T cell proliferation -		1.3	1.3	
positive regulation of T cell activation -		2.9	2.0	
positive regulation of production of molecular mediator of immune response -		1.7	1.8	
positive regulation of immune response -		4.2		
positive regulation of immune effector process -		4.2	2.9	
positive regulation of B cell differentiation -		1.3		
positive regulation of alpha-beta T cell activation -		2.0		
positive regulation of adaptive immune response based on somatic recombination of immune receptors built from immunoglobulin superfamily domains -		2.4		
positive regulation of adaptive immune response -		2.1		
negative regulation of immune system process -		2.6		
negative regulation of immune response -		3.0		
myeloid cell activation involved in immune response -		1.5		
lymphocyte activation involved in immune response -		3.3		
leukocyte activation involved in immune response -		4.4	2.0	
innate immune response-activating signal transduction -		1.8		
innate immune response activating cell surface receptor signaling pathway -		1.6		
innate immune response -		4.4		
immunoglobulin mediated immune response -		1.5		
immune response-regulating signaling pathway-		4.2		
immune response-regulating cell surface receptor signaling pathway-		2.1		
immune response–activating signal transduction-		1.5		
immune response-activating cell surface receptor signaling pathway-		1.5		
immune effector process -		4.8	1.7	
cell activation involved in immune response		4.4	2.0	
alpha-beta T cell activation -		2.1		
adaptive immune response based on somatic recombination of immune receptors built from immunoglobulin superfamily domains -		3.4		
adaptive immune response -		4.8		
activation of innate immune response		1.4		
activation of immune response -		2.2		
	Caudate Dentate	Gyrus ,	JLPFC HIPPOCAMPUS
